BaaS & DRaaS

BaaS & DRaaS

NEW Continuous Data Protection

# Resiliency actualized with near-zero RPOs

Minimize data loss for critical workloads with near-zero recovery point objectives (RPOs), recovering to the latest state or point in time to deliver the resiliency your business demands.

NEW Hardened Linux Repository

# Reliable

# Ransomware Protection

Keep data safe with immutable and malware-safe storage repositories for backups and prevent malicious encryption and deletion.

NEW Archive Tier in Scale-out Backup Repository

# Amazon S3 Glacier and Azure Archive

Up to 20x cost savings using **AWS Glacier** or Azure Archive cold storage to achieve secure lifecycle management of backups.

EXPANDED Instant Recovery

# Ultra-low RTOs for databases and NAS

Achieve the lowest recovery time objectives (RTOs) with production-ready instant recovery for SQL, Oracle and NAS from the pioneer of Instant VM Recovery®.

NEW Veeam Service Provider Console v5

# Veeam-powered BaaS & DRaaS

Backup and DR experts are here to help you save the day thanks to integrated services powered by Veeam Service Provider Console v5.
